

New journey with 9,999 NFTs

NF-Tim

First NFT utility project for Developers and Designers
based on

elrond

Build immersive Web & Mobile experiences
Using Fully Coded UI Tools

What are we looking to solve?

- Building websites and mobile apps from scratch is time and money consuming.
- Developers and Designers with 8-10 years of experience are very expensive and hard to find.
- Having a common language between the Developers and Designers is hard without having a Design System with straight rules.
- Every year new devices with multiple screen sizes are launched; you must make sure your web or mobile app is looking great on each one.
- Most of the time, you build using multiple Open Source libraries which don't have a similar look.

Previous points are hard when you are building for Web 2.0.

Adding a new layer of complexity and building on top of **Web 3.0** will be even more frustrating, expensive, and time-consuming. We are here to make the things easier.

Who we are? About Creative Tim

8 years of experience in building the next gen of Web & Mobile UI Tools.

Where we are

First NFT utility project based on Elrond for Developers and Designers!

Get **instant access** by using our NFTs:

- **70+** Bootstrap UI Kits & Dashboards (over \$6,000 in value);
- **25+** React UI Kits & Dashboards (over \$1,900 in value);
- **28+** Vuejs UI Kits & Dashboards (over \$2,500 in value);
- **10+** Angular UI Kits & Dashboards (over \$700 in value);
- **7** Mobile UI Tools (over 1,000\$ in value);
- **25+** Back-End UI Kits & Dashboards (over \$3,800 in value);
- **25+** Products on Figma/Sketch/Adobe XD/PSD (over \$2,000 in value);
- Digital version of our UI/UX Book (8 years of know-how - invaluable).

Where are we going

1. Migrate our current tools from **Web 2.0** to **Web 3.0**.
2. Create a suite of new **Web 3 UI Tools & dApps** based on Elrond for developers.
3. Create **No-Code & Low Code Builders** for non-developers.
4. Write articles & materials that future **Web 3.0 developers** can use to build real life applications on Blockchain.
5. Other surprises for our **NFTs Holders**.

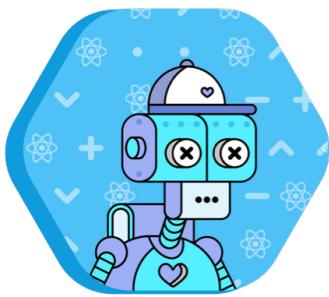

Let's start with the first step to Web 3.0

Join our NFT journey and get your Meta-characters! All of them have utilities that will give you instant access to premium products for web developers and UI/UX designers.

$$3,333 \text{ Meta-Bot} + 3,333 \text{ Meta-Human} + 3,333 \text{ Meta-Tim} = 9,999 \text{ NFTs}$$

Meta-Bot Collection

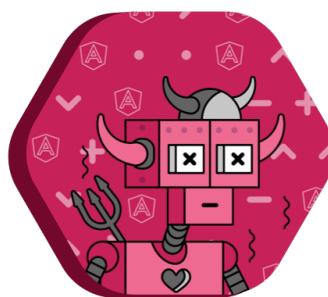

The 3,333 NFT collection that will give you access to Premium Frontend & Backend UI Tools for Developers.

Meta-Bot React

25 React Products

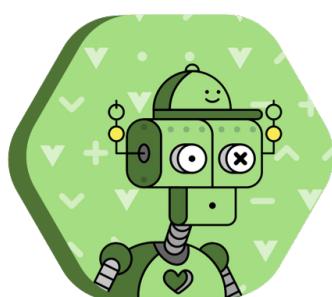

- Access to 8 [UI Kits](#)
- Access to 17 [Dashboards](#)

Meta-Bot Angular

10 Angular Products

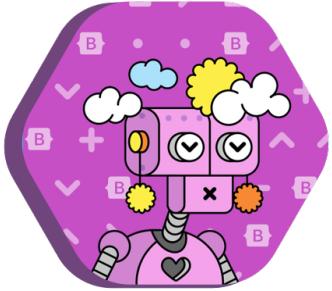

- Access to 4 [UI Kits](#)
- Access to 6 [Dashboards](#)

Meta-Bot Vue

28 Vue Products

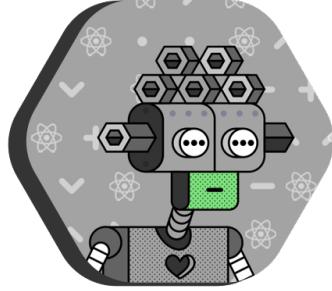

- Access to 4 [UI Kits](#)
- Access to 24 [Dashboards](#)

Meta-Bot Bootstrap

25 Bootstrap Products

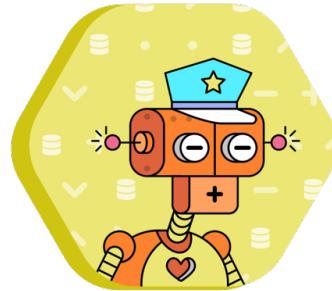

- Access to 14 [UI Kits](#)
- Access to 11 [Dashboards](#)

Meta-Bot Mobile

7 Mobile Products

- Access to 4 [React Native](#)
- Access to 3 [Flutter](#)

Meet the **Ultimate collection** of NF-Tim! It will give you instant access to all fully coded premium products and resources developed by Creative Tim.

The Meta-Tim will give you **access to**:

- 25 [React Products](#)
- 28 [Vuejs Products](#)
- 10 [Angular Products](#)
- 25 [Bootstrap Products](#)
- 7 [Mobile Products](#)
- 26 [Backend Products](#)
- 29 [Designer Products](#)
- UI/UX Book: [“Fundamentals of Creating a Great UI/UX” by Creative Tim](#)

Who are we?

Creative Tim

Creative Tim is a Romanian company that was started in 2014. It is owned 100% by Romanian founders, it was bootstrapped and never got an external investment. Here are some of our results:

1. Launched one of the most popular Bootstrap Dashboards, used also at Stanford University - 2015

Back in 2015 you couldn't find user-friendly interfaces. The developers' world, was full of products bloated with random features. We created a simple and minimalist UI Dashboard which was one of the first products in its niche with Open Source Code.

2. Organised the 1st Dribbble Meetup in Romania - 2015

Dribbble is one of the biggest Designers communities around the world, with over 6 million people. We invited the most important designers from Romania and made the first local event.

Sources: [Dribbble Meetups](#), [Creative Tim Blog](#)

3. Been one of the first companies in the world who implemented Google's Material Design principles in a product - 500.000+ downloads - 2016

We took the conceptual principles made by Google in their Material Design System and implemented 2 fully coded products. The community was so happy with these releases and we got over 5.000 Stars and 10.000 Stars on Github.

4. Launched Now UI Kit with Invision's Design and got chosen as Product of the Day & Week on Product Hunt - 2017

Invision was one of the most used design tools back in 2017. So we talked with them and made one of their UI Tools as a fully functional Web UI Kit. The product got 1500+ Upvotes by the Product Hunt Community.

5. Milestone - 600+ Sponsored Hackathons & Events around the world

We worked closely with Techstars_ Startup Weekend and multiple Universities around the world to support their Hackathons and Events. We sponsored each of these events with Licenses to our products.

Sources: [Sponsorships](#), [Techstars_ x Creative Tim](#)

6. Chosen as one of the top 10 Theme Providers in the world by the Bootstrap Team - 2018

Since 2018 we've started to work with the founders of Bootstrap to create products for their new marketplace. Bootstrap is one of the most downloaded UI libraries in the world, with over 168 million downloads/year.

Source: [Bootstrap Blog](#)

7. Milestone - 100.000\$ paid to the Open Source Software Ecosystem - 2019

Our products were the first to appear on material-ui.com, vuejs.com, or vuetify.com. We were one of the first creators in the world who paid % of the products' revenue to those frameworks.

Source: [OpenCollective.com](https://opencollective.com)

8. One of the most popular Wordpress Themes is made with our Design - 100.000+ active installs - 2018

Hestia, made in partnership with another Romanian company, Themelsle, was one of the top 10, most downloaded Themes on Wordpress. The theme is still active with over 100.000 websites even after 4 years since its launch.

Sources: [Themelsle Website](https://themelsle.com)

9. Galio - Launched our first Open Source Mobile Framework on top of React Native - 2019

After the success in the Web ecosystem, we decided to take it to the Mobile world. We released an Open Source Framework and then we created a couple of UI Kits on top of that. In 2021, the former employee who built the framework also wrote a book about it.

Sources: [Github Galio](https://github.com/galioframework), [Amazon Book](https://www.amazon.com/GALIO-Mobile-Framework-React-Native/dp/1734000000)

10. Launched the first batch of Full Stack Products - 2019

Many users started to integrate our products with different backend technologies and requested help from our end. We partnered with 2 other Romanian companies: [Appseed.us](https://appseed.us) and [Updivision.com](https://updivision.com) and we started to deliver Fully Coded Apps.

11. Milestone - 1.000.000 Registered Developers & Designers on our website - 2020

One of the most important events that happened to our company was when we hit the 1 Million registered accounts on our website. This event came after years of unstoppable work. The first million was the hardest. Currently, we have 1,870,000 people using our products.

12. Investment - Themesberg, another Romanian Company that is doing digital tools - 2020

We always got help and learned from bigger companies, so it was natural to help others succeed. We found a perfect match between Creative Tim and Themesberg and we decided to invest in their future.

Sources: [ZF.ro Article](#), [Forbes Interview](#), [Start-up.ro Article](#)

13. Education - Started a short video learning format on TikTok - 7.000.000+ views

During the years, we created Videos and Blog posts teaching people how to start working with the development tools. Since 2021 we tested a new "Learning Format" on TikTok. That was a huge success so far; people love to learn something new in 15 seconds.

Sources: [TikTok](#), [Youtube](#), [Instagram](#)

14. Investment - Simmple, another Romanian company doing digital tools - 2021

After the successful investment in Themesberg in 2020, we decided to support another local company, [Simmple.com](#). Simple was founded by 2 very young guys, 17 years old.

Sources: [ZF.ro IT Generation Interview](#)

15. Book Launch - released our First physical UI/UX Book - sold out in 1 week - 2022

We've always looked to give back, that's why our business model is based on Open Source Ecosystem. After some educational articles we decided that it was the time to put 8 years of experience in a UI/UX Book. The Book can also be found in the [National Library of Romania](#)

Source: [Book Presentation](#)

We did all these things individually in the Web 2.0 ecosystem. Imagine what we can do together.

Web 3.0 is all about community, let's build!
